

BasePaymaster

```
classDiagram
    class BasePaymaster
    class Paymaster {
        +validateUserOp()
    }
    Paymaster --|> BasePaymaster
```

The diagram illustrates a class hierarchy. At the top is the **BasePaymaster** class, represented by a light green box with a black border. Below it is the **Paymaster** class, represented by a white box with a black border. A vertical line with an open triangle arrowhead points from the **Paymaster** class to the **BasePaymaster** class, indicating that **Paymaster** inherits from **BasePaymaster**. The **Paymaster** class has a single method, `+ validateUserOp()`, listed in its bottom section.

Paymaster

+ validateUserOp()
